Environmental Policy

It is the policy of the company to ensure that its work and processes do not contribute to environmental pollution. The company will therefore comply with the requirements of the Environmental Protection Act 1990 and all relevant regulations when it is practicable to do so.

The company will encourage employees to avoid harming the environment and to report any potential environmental hazards.

The company will minimise the amount of waste generated by re-using or recycling as much as possible before resorting to disposal. When disposal is necessary the company will ensure that waste is disposed of safely by using licenced contractors.

Where it is within our control we undertake the following:-

- 1 To comply with current and future legislation on environmental issues, e.g. Environmental Protection Act 1990 and the Control of Pollution (Amendment) Act 1989. Under this Act, we are licensed to carry controlled waste.
- 2 To maintain our environmental management system and quality assurance guideline requirements.
- 3 As part of our proposed environmental management system we will set and review our environmental objectives to assist with continuous improvement in this respect.
- 4 To offer suggestions that may reduce the environmental impact of a project in its design, installation methods/specification and construction.
- 5 To carry out on-site 'environmental risk assessments' to formulate plans that will help reduce the impact of things such as noise, dust and waste. We would consult with local residents/companies on any particular concerns.
- 6 To ensure the staff are properly trained in all aspects of use of hazardous substances, including appropriate methods of storage and disposal.
- 7 To wherever and whenever possible, employ a system of recycling for items such as metal and cardboard.
- 8 To ensure that our electronic waste is either recycled by a fully licensed organisation or disposed of in accordance with WEE Regulations.

- 9 To work with suppliers and sub-contractors to improve our combined environmental performance.
- 10 The Company will regularly audit the Company's operations from an environmental standpoint and set out standards for improvements.
- 11 To take into account the energy efficient properties of any new plant, transport and equipment when purchased. To ensure that all plant, transport and equipment are regularly maintained so as to minimise pollution.

It is the responsibility of all our employees to support and apply those sections of the Company Environmental Policy and procedures that relate to their activities.

The Company will provide the appropriate support and training to ensure that they are able to fulfil the commitments given in this statement of policy.

The company will regularly audit the company's operations from an environmental standpoint and set out standards for improvements.

Signed 

Nathan Smith - Director
